| Rank | Name | Location | Subsidy Total 1995-2010 |
|------|--|-------------------|----------------------------|

Note: The information on conservation spending for 2010 is incomplete due to missing data from USDA's Natural Resource Conservation Service. Payment data currently are not included for the Environmental Quality Incentives Program, but will be added once NRCS makes it available.

The information provided for the Wetland Reserve Program (WRP) provides an inaccurate picture of how WRP payments are distributed. USDA's Natural Resource Conservation Service uses title companies as intermediaries to finalize wetlands easements under the Wetlands Reserve Program. As a result, the data provided to us shows large sums of money going to these title companies. In reality, the payments are ultimately distributed to landowners participating in the WRP.

Unfortunately, NRCS has not provided the data to show where these farms and wetlands are located or which farmers or landowners are enrolling in the program, so EWG is unable to allocate these large sums of money to individuals beyond the title companies. Therefore, these companies skew the conservation rankings and payment concentration, which EWG cannot avoid unless and until NRCS makes available the additional farm attribution data. Therefore, we have not included WRP payments in the 2010 data update.

Finally, we have separated data on farm commodity, disaster and conservation payments in order to provide a more accurate picture of top recipients and concentration of payments among the three main categories of USDA programs.

Schmiedeleut

Schmiedeleut, one of the three Hutterite kinship groups (the other two being the Dariusleut, and the Lehrerleut, so named because its founder, Preacher Michael Waldner, was a black smith (*Schmied*) in Russia. Michael Waldner was the first to re-establish communal living in Bruderhof form, which he did in 1859 in one end of the village of Hutterdorf in the Ukraine (see Dariusleut). The Waldner Bruderhof migrated to South Dakota in 1874 and settled the Bon Homme Colony near Yankton. This was the first Hutterite Bruderhof in America and is commonly, though wrongly, thought of as the mother Bruderhof of all Hutterites in America. The second kinship group, the Dariusleut, which was established in 1860 in the same Hutterdorf village in Russia, arrived in South Dakota later in 1874 and did not establish its first Bruderhof (Wolf Creek) until the next year, 1875. In the late 1950s the Schmiedeleut Bruderhofs in the United States were all in South Dakota, and those in Canada were all in Manitoba, and they were the only group having Bruderhofs in these two locations. Their leader or bishop was Peter Hofer, James Valley Colony, Starbuck, Manitoba, who was chosen in 1951. Following is a list of the Schmiedeleut Bruderhofs as they existed in 1957.

Schmiedeleut

Schmiedeleut, one of the three Hutterite kinship groups (the other two being the Dariusleut, and the Lehrerleut, so named because its founder, Preacher Michael Waldner, was a black smith (*Schmied*) in Russia. Michael Waldner was the first to re-establish communal living in Bruderhof form, which he did in 1859 in one end of the village of Hutterdorf in the Ukraine (see Dariusleut). The Waldner Bruderhof migrated to South Dakota in 1874 and settled the Bon Homme Colony near Yankton. This was the first Hutterite Bruderhof in America and is commonly, though wrongly, thought of as the mother Bruderhof of all Hutterites in America. The second kinship group, the Dariusleut, which was established in 1860 in the same Hutterdorf village in Russia, arrived in South Dakota later in 1874 and did not establish its first Bruderhof (Wolf Creek) until the next year, 1875. In the late 1950s the Schmiedeleut Bruderhofs in the United States were all in South Dakota, and those in Canada were all in Manitoba, and they were the only group having Bruderhofs in these two locations. Their leader or bishop was Peter Hofer, James Valley Colony, Starbuck, Manitoba, who was chosen in 1951. Following is a list of the Schmiedeleut Bruderhofs as they existed in 1957.

EWG Farm Subsidy Database**Corporate Subsidy Recipients 1 to 1 of 1 in South Dakota****Business Name: COLLINS HUTTERIAN**

| Rank | Name | Location | Subsidy Total 1995-2010 |
|------|---|---------------------|----------------------------|
| 1 | <u>Collins Hutterian Brethren Inc</u> | Frankfort, SD 57440 | \$ 173,130.44 |

Note: The information on conservation spending for 2010 is incomplete due to missing data from USDA's Natural Resource Conservation Service. Payment data currently are not included for the Environmental Quality Incentives Program, but will be added once NRCS makes it available.

The information provided for the Wetland Reserve Program (WRP) provides an inaccurate picture of how WRP payments are distributed. USDA's Natural Resource Conservation Service uses title companies as intermediaries to finalize wetlands easements under the Wetlands Reserve Program. As a result, the data provided to us shows large sums of money going to these title companies. In reality, the payments are ultimately distributed to landowners participating in the WRP.

Unfortunately, NRCS has not provided the data to show where these farms and wetlands are located or which farmers or landowners are enrolling in the program, so EWG is unable to allocate these large sums of money to individuals beyond the title companies. Therefore, these companies skew the conservation rankings and payment concentration, which EWG cannot avoid unless and until NRCS makes available the additional farm attribution data. Therefore, we have not included WRP payments in the 2010 data update.

Finally, we have separated data on farm commodity, disaster and conservation payments in order to provide a more accurate picture of top recipients and concentration of payments among the three main categories of USDA programs.

* According to USDA percentage shares for ownership may not reflect share of subsidy payments. EWG review shows that share information on file with USDA may not always equal 100 percent. Most recent percentage share information is from 2008. Future release of this information was barred by law in the 2008 Farm Bill.

Note: The information on conservation spending for 2010 is incomplete due to missing data from USDA's Natural Resource Conservation Service. Payment data currently are not included for the Environmental Quality Incentives Program, but will be added once NRCS makes it available.

The information provided for the Wetland Reserve Program (WRP) provides an inaccurate picture of how WRP payments are distributed. USDA's Natural Resource Conservation Service uses title companies as intermediaries to finalize wetlands easements under the Wetlands Reserve Program. As a result, the data provided to us shows large sums of money going to these title companies. In reality, the payments are ultimately distributed to landowners participating in the WRP.

Unfortunately, NRCS has not provided the data to show where these farms and wetlands are located or which farmers or landowners are enrolling in the program, so EWG is unable to allocate these large sums of money to individuals beyond the title companies. Therefore, these companies skew the conservation rankings and payment concentration, which EWG cannot avoid unless and until NRCS makes available the additional farm attribution data. Therefore, we have not included WRP payments in the 2010 data update.

Finally, we have separated data on farm commodity, disaster and conservation payments in order to provide a more accurate picture of top recipients and concentration of payments among the three main categories of USDA programs.

Schmiedeleut

Schmiedeleut, one of the three Hutterite kinship groups (the other two being the Dariusleut, and the Lehrerleut, so named because its founder, Preacher Michael Waldner, was a black smith (*Schmied*) in Russia. Michael Waldner was the first to re-establish communal living in Bruderhof form, which he did in 1859 in one end of the village of Hutterdorf in the Ukraine (see Dariusleut). The Waldner Bruderhof migrated to South Dakota in 1874 and settled the Bon Homme Colony near Yankton. This was the first Hutterite Bruderhof in America and is commonly, though wrongly, thought of as the mother Bruderhof of all Hutterites in America. The second kinship group, the Dariusleut, which was established in 1860 in the same Hutterdorf village in Russia, arrived in South Dakota later in 1874 and did not establish its first Bruderhof (Wolf Creek) until the next year, 1875. In the late 1950s the Schmiedeleut Bruderhofs in the United States were all in South Dakota, and those in Canada were all in Manitoba, and they were the only group having Bruderhofs in these two locations. Their leader or bishop was Peter Hofer, James Valley Colony, Starbuck, Manitoba, who was chosen in 1951. Following is a list of the Schmiedeleut Bruderhofs as they existed in 1957.

Note: The information on conservation spending for 2010 is incomplete due to missing data from USDA's Natural Resource Conservation Service. Payment data currently are not included for the Environmental Quality Incentives Program, but will be added once NRCS makes it available.

The information provided for the Wetland Reserve Program (WRP) provides an inaccurate picture of how WRP payments are distributed. USDA's Natural Resource Conservation Service uses title companies as intermediaries to finalize wetlands easements under the Wetlands Reserve Program. As a result, the data provided to us shows large sums of money going to these title companies. In reality, the payments are ultimately distributed to landowners participating in the WRP.

Unfortunately, NRCS has not provided the data to show where these farms and wetlands are located or which farmers or landowners are enrolling in the program, so EWG is unable to allocate these large sums of money to individuals beyond the title companies. Therefore, these companies skew the conservation rankings and payment concentration, which EWG cannot avoid unless and until NRCS makes available the additional farm attribution data. Therefore, we have not included WRP payments in the 2010 data update.

Finally, we have separated data on farm commodity, disaster and conservation payments in order to provide a more accurate picture of top recipients and concentration of payments among the three main categories of USDA programs.

Therefore, these companies skew the conservation rankings and payment concentration, which EWG cannot avoid unless and until NRCS makes available the additional farm attribution data. Therefore, we have not included WRP payments in the 2010 data update.

Finally, we have separated data on farm commodity, disaster and conservation payments in order to provide a more accurate picture of top recipients and concentration of payments among the three main categories of USDA programs.

Golden View Hutt Breth Inc received payments totaling \$6,932 from 1995 through 2010

Note: The information on conservation spending for 2010 is incomplete due to missing data from USDA's Natural Resource Conservation Service. Payment data currently are not included for the Environmental Quality Incentives Program, but will be added once NRCS makes it available.

The information provided for the Wetland Reserve Program (WRP) provides an inaccurate picture of how WRP payments are distributed. USDA's Natural Resource Conservation Service uses title companies as intermediaries to finalize wetlands easements under the Wetlands Reserve Program. As a result, the data provided to us shows large sums of money going to these title companies. In reality, the payments are ultimately distributed to landowners participating in the WRP.

Unfortunately, NRCS has not provided the data to show where these farms and wetlands are located or which farmers or landowners are enrolling in the program, so EWG is unable to allocate these large sums of money to individuals beyond the title companies. Therefore, these companies skew the conservation rankings and payment concentration, which EWG cannot avoid unless and until NRCS makes available the additional farm attribution data. Therefore, we have not included WRP payments in the 2010 data update.

Finally, we have separated data on farm commodity, disaster and conservation payments in order to provide a more accurate picture of top recipients and concentration of payments among the three main categories of USDA programs.
